

CHIEFTON
SOUTH AFRICA

Engineering Professional Services

Many of our repeat clients anticipate Chiefton to provide full professional services and prefer a single point of contact. Each project is headed by a Director and our in-house services include Project Management, Process Engineering, Principal Engineering Design and Construction Management. This enables all our staff to draw on a wealth of experience within the office.

As part of this service, we consider requirements for any specialist designer input and advise our clients accordingly. We have excellent working relationships with many key partners including Ecologists, Geotechnical Engineers, Surveyors, Environmentalists and Cost engineering.

The approach of the company is to create a design environment which is conducive to making a difference to improve the quality of life of people with respect to their physical, social, institutional, economic, financial, and environmental well-being. It is unquestionable that good design of infrastructure is central to all economic sustainability. Good & Efficient Infrastructure in Urban and Rural Hubs accelerates proficiency in key economic services and supports strong economic growth.
