

Facilities Management

Whether services are outsourced or managed in-house, our experienced consultants ensure that steps are built into the process to ensure that the system is fully auditable.

Where appropriate, we will ensure that the payment mechanism takes account of synergy with other contracts, so that helpdesk staff operate in a familiar environment to ensure their learning curve is minimal.

Our payment mechanism consultancy services ensure that you have the design and calibration of the payment mechanism right from the outset, in order to ensure long-term project success.
