

CHIEFTON
SOUTH AFRICA

Investments

On the back on a successful track record spanning 15 years, Chiefton South Africa takes pride in the knowledge that we are able diversify into external investment oppurtunities.

The aim of these investments companies is to create a platform where our current business can leverage its services from the successes of these investments.

Although these are ringfenced entities, external investment ventures utilise shared resources for operations.

Each investment company has its own business plan and board of directors to govern its operations.
